

VOLODYA GURDIN

Software Engineer

vladi.gurdin@gmail.com

CAREER SUMMARY

Passionate Software Engineer from Russia. Worked for four years for Intapp company on several big startups based around microservices, Java and AWS world. I participated in all aspects of a project life, from features design and code to working as scrum master and coaching newbies. As a developer my eyes were mostly focused on server side and infrastructure parts of the app.

After hard and very busy work I took a sabbatical to spent time for travelling, study music and photography art. Worked on couple personal projects and played with Kotlin just for fun.

WORK EXPERIENCE

Software Engineer - Personal Projects

Pets

Present

Polyrhythm Machine:

Drum Machine helps you explore and create new groves with any time signatures and any combination you want.

Javascript **ToneJs** **HTML/CSS** **MIDI**

Negative Darkroom:

Application for made in China film scanner to get the best images (as much as the scanner can get) from the film negatives. Includes image processing features such as Brightness/Contrast, Color Correction, Levels, Crop, Histograms etc...

Kotlin **TornadoFx**

Full Stack Engineer - Intapp: Experience

Akvelon

Aug 2016 – Jan 2019 (2 yr 6 mo)

Multi-tenant microservices application based in AWS that helps lawyer and accounting firms manage their work and clients with advanced search focused to find the best expertise for new project/client.

Worked on:

- Developing both Frontend and Backend
- Creating an operational service for managing tenants in one click
- Refactoring code and infrastructure
- Designing architecture and building infrastructure in AWS (EC2, ECS, CloudFormation, RDS, DinamoDb, ElasticCache, S3, ELK etc...)
- Building CI/CD pipeline (Circle Ci, Gitlab Ci)
- Writing automated tests and improving tests framework/performance
- Performing code review, maintaining Jira, participating in meetings with customers, working on improving Scrum/Agile team practices

Technologies used:

NodeJs **Spring Boot** **Sequelize** **JavaRx** **PostgresSQL** **Elasticsearch** **Redis**
RabbitMq **AngularJs** **Sass** **Pug** **Aws** **Docker** **DockerCloud** **ELK**
